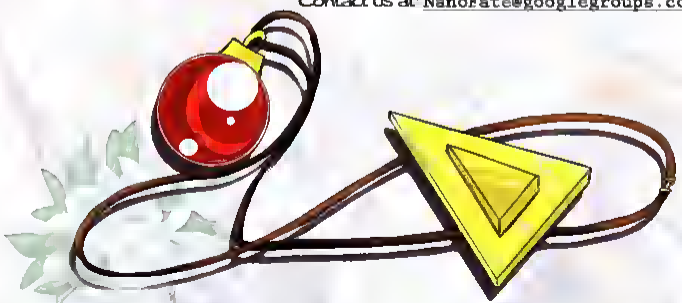
We are looking for an extra Japanese-to-English translator to give us an extra hand to our translation group. We want to work in some of the doujins from the latest batch of scans provided by ShiroAka (http://nanofate.us/content/general-doujinshi?page=23#comment-34261, direct link to the post in our Website), or we can also work on other NanoFate doujins of your liking if you prefer.
If other translation groups want to work on any of these doujins, your work would be appreciated too. We can link your release in our site if you do so.

Download more doujins and images at our Website: www.nanofate.us
Contact us at: NanoFate@googlegroups.com



If you're reuploading our scanlations, please add this page as well.
